## 露营半山林海

### CAMPING IN THE WOODLANDS HALFWAY UP A HILL

露营至半夜，星光变得黯淡，天气预报说今晚有雨，果然。打开车灯，将帐篷门厅掩好，不大一会儿，风亦来，雨亦来，听半山林海微微呼啸，如置身世外。

The weather forecast said it would rain tonight, and how true it was. The stars were not shining very brightly. We turned on the lamp, fastened the door of the tent closed, and soon the rain and wind appeared. We entered a different world where we listened to the wind bluster in the woodlands.

## 如此近的天空

### THE SKY IS SO CLOSE

周末去露营，撑起自驾露营全套装备，如同撑起一片静谧纯净的天空。女儿说，天变得好近，一伸手就能碰到。感谢这次露营，让我的小女儿说出这么诗意的话，让她做一个美梦。

We went camping at the weekend. We set up our auto-camping set. It looked like we had set up a clear blue sky. My daughter said "I feel the sky has become closer as if I can touch it with my out-stretched hand". I am thankful for this camping experience that it gave my daughter a beautiful and poetic dream.

## 户外的理想国

### THE OUTDOORS: MY DREAM COUNTRY

离开过度喧嚣商业化的都市开车到户外，  
撑起帐篷搭起凉篷摆好桌椅，从蓝色的保温箱中拿出水果饮料，  
与你在清新的阳光中畅谈一番，这是与我的理想最接近的事。  
户外，就是我的理想国。

We drive away leaving the big bustle of the city behind.  
We set up the tents and the sunshade and take the food  
and drinks out of the blue cooler box. Spending a day  
in the sunshine with you is the closest to my dream day.  
The outdoors is my dream country.

## 一种温暖在我的心里越来越满 A WARM IN MY HEART MORE FULL

一轮明月挂在夜空，篝火旁我教女儿认天上的星星。  
“爸爸，我困了，明天再看吧。”  
“好的，宝贝，回帐篷睡觉吧，爸爸还想再坐一会。”  
不一会女儿又回来了，小手中拿着一件冲锋衣，  
“爸爸，外面风大，小心着凉。”  
山风把我的头发吹得越发凌乱，一种温暖却在我的心里越来越满，这孩子开始懂事了。

The moon hanging in the sky,campfire I teach daughter recognize the stars in the sky.  
"Dad,I'm sleepy.tomorrow to see."  
"Ok,honey,back to the tents to sleep,dad would still like to sit down for a while."  
Different meeting daughter came back again,small hand one charge clothes,  
"dad,it's windy outside,be careful to catch a cold."  
Mountain wind blowing up my hair more messy,a warm,

All the materials chosen to be used in the production of KingCamp Sleeping Bags are of the highest quality available in the market. Once these materials are selected they are strictly tested in our own laboratory prior to being used to produce a KingCamp Sleeping Bag.

KingCamp Sleeping Bags are built with "2 - Way Combinable Zippers" to join sleeping bags together to convert to a double sleeping bag.

All KingCamp Sleeping Bags that are filled with "White Goose Down" or "White Duck Down" have a special treatment applied "Down Proof Treatment" that prevents down leakage.

In the construction of KingCamp Sleeping Bags is a "Double Layer Filling" to keep our customers as comfortable and warm as possible. The care and attention in design and construction is evident in especially difficult outdoor weather outdoor conditions. Compared with a one layer sleeping bag at the same weight of filling, the KingCamp two layer sleeping bag is much more comfortable and warmer while bringing more protection and pleasure to the camper during outdoor travel.

## 温标范围:

KingCamp参照欧标EN-13537, 根据男女体质的不同, 科学合理地核定了每款睡袋的温标, 每款睡袋都准确地标准了3种相关温度:

- 舒适温度
- 限制温度
- 极限温度

舒适温度: 一个正常女性获得舒适睡眠的温度。

限制温度: 一个正常男性获得舒适睡眠的温度。

极限温度: 一个正常女性睡眠出现健康或者危险前的温度。

根据新的标准和标记, 在KingCamp找到一款合适的睡袋是轻而易举的事情。

## The Temperature Rating:

We scientifically rate our sleeping bags so they match the European standard (EN 13537). Our scientific method has been implemented to easily determine the temperature limit of our sleeping bags. Our new standard uses a dummy clothed in a base layer and socks to determine the actual COMFORT temperature for a good night's sleep.

We have developed a grid containing three relevant temperature ratings for every bag (comfort temperature, limit temperature for woman and men and extreme temperature):

- "COMFORT" temperature is based on a standard woman having a comfortable night's sleep (neither cold nor warm).
- "LIMIT" temperature for standard men is the lowest temperature for a standard man to have a comfortable night's sleep.
- "EXTREME" temperature is the lowest temperature before a health risk can occur for a standard women.

With these new standards and markings, finding the right bag from KingCamp has never been easier.

## KingCamp背包功能科技 KingCamp Backpack Technical Information

### K.A.C.空气调节器

背部选用超强透气性点状分离支撑系统，当背负时可使背部和背包分离，确保了优越的透气性。在潮湿和炎热的气候环境下，保证背部的干爽。为了提高背负时的稳定性，背部嵌入聚乙烯树脂支撑板。

Ventilation is provided by a duct situated between the back of the rucksack and the back of the net. By restricting the area of contact to 6 points, this creates a current of air and perspiration is equally reduced. The frame transfers the weight to the waist belt and the load stays close to the back of the net.

### V.U.S.空气调节系统

拥有优越的透气性，保证背部的干爽，根据人体在背包负重的情况下背部受力特点精心打造背部线条，嵌入聚乙烯树脂支撑板，超轻铝管弧形支撑系统。确保了背负的稳定性，提供了优越的舒适性。

The V.U.S. back guarantees great breathability and dryness. Combining an aluminum tube with a poly ethylene panel ensures excellent carrying stability, and the shaped padding offers better weight distribution.

### A.C.S.背负系统

A.C.S.背负系统是KINGCAMP公司根据人体力学原理研发的一款舒适，高透气背负系统。确保背包运动中优越的舒适性和背部的干爽。在潮湿和炎热的气候环境下，保证背部的干爽。

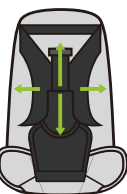

Designed by Kingcamp, the A.C.S back system guarantees great breathability and comfort for people of all sizes engaging in a variety of sports in extreme temperatures.

### K.A.S. 可调节背负系统

K.A.S. 可调节器系统是在K.R.S. 系统上做了相应的提升，更加符合人体背部受力特点，确保了负重运动中优越的稳定性，并很好的将重量垂直、均匀、合理分布在胯部。

The K.A.S adjustment panel is an improved version of the K.R.S adjustment back system. By transferring the load to the pelvis (the top of the hip bone), it ensures the highest stability for the backpack.

### K.R.S. 调节器系统

K.R.S. 调节器系统是根据人体背部受力特点，经过不断的测试、革新，研发而出的性能卓越的背负系统，背部嵌入聚乙烯树脂支撑板，中部嵌入航空铝条，确保了负重运动中优越的稳定性，并很好的将重量垂直、均匀、合理分布在胯部。肩带及腰带填充双倍高密度海绵，大大提高了背包的舒适性；魔术贴抽带调节设计，依据使用者不同的背部尺寸，调整魔术贴粘带同时移动背部肩带即可轻松调节背负长短，腰带调节轻松自如，并可拆卸使用。

The K.R.S adjustment panel is an innovative adjustable back panel system. The back panel insert has a central self-modeling aluminum framework with a poly ethylene panel ensuring the highest stability. By transferring the load to the top of the hip bone, the strongest part of the skeleton, the load bearing belt reduces the weight on the shoulders, providing increased comfort. The shoulder straps can be altered up or down by opening or closing the self fastening tab on the central part of the harness.
